Professional Summary

Cloud and DevOps Engineer adept at managing CI/CD delivery, Infrastructure as Code, cloud infrastructure, Kubernetes, observability, automation, and DevSecOps. Proficient in Terraform and Ansible, GitLab CI/CD and GitHub Actions. Experienced with GCP, AWS, Kubernetes/GKE, OpenShift, and tools like Prometheus, Grafana, Loki, and Alertmanager. Skilled in Python and Bash scripting for automation. Expert in creating secure, high availability environments using least privilege IAM, zero trust controls, container security, and ensuring zero downtime deployments across hybrid, multi cloud, and production infrastructures.

Core Technical Skills

Cloud & Infrastructure

GCP, Google Kubernetes Engine (GKE), AWS, Hetzner Cloud, Linux, RHEL, Ubuntu, GCP VPC, Cloud NAT, Load Balancing, Cloud DNS, Cloud Storage, Artifact Registry

CI/CD & DevSecOps

GitLab CI/CD, GitHub Actions, Jenkins, Docker, ArgoCD, Trivy, SonarQube, Container Security, Secrets Management, Automated Deployments, Zero-Downtime Releases

Observability & Reliability

Prometheus, Grafana, Loki, Alertmanager, GCP Cloud Monitoring, Cloud Logging, Metrics, Log Aggregation, Alerting, 99.9% Availability

Infrastructure as Code & Automation

Terraform, Ansible, Python, Bash, PowerShell, Infrastructure Provisioning, Configuration Management, Automation

Kubernetes & Containers

Kubernetes, GKE, Red Hat OpenShift (OKD), Docker, Ingress, HPA, RBAC, Network Policies, Workload Identity

Security & Networking

IAM Least Privilege, Zero Trust, Cloud Armor, VPC Peering, VPN, Active Directory, Keycloak SSO, Network Security Policies, DNS, Public/Private Networking

Professional Experience

DevOps & Cloud Infrastructure Engineer, EBTEKAR WAKHTHOR LTD

05/2025 – Present
Riyadh, Saudi Arabia

- Provisioned multi-tenant GCP and AWS environments with modular Terraform and Ansible. Configured custom VPCs, Cloud NAT, and load balancers, reducing infrastructure setup time by over 80%.
- Managed multi-stage GitLab CI/CD pipelines for .NET and Python microservices. This included automated builds, image publishing to GCP Artifact Registry, build caching, and zero downtime rolling deployments, cutting feedback loops by 60%.
- Administered high-availability GKE and Red Hat OpenShift (OKD) clusters using Workload Identity, Ingress, HPA, RBAC, and detailed network policies.
- Implemented DevSecOps controls such as IAM least privilege, service account key rotation, Trivy container scanning, and SonarQube quality gates.
- Enhanced production reliability through automated infrastructure management, secure networking, and Kubernetes-based deployment practices.

Cloud Administrator & Infrastructure Engineer (Part-Time), RAED IT SERVICES

01/2023 – 01/2026
Remote

- Maintained 99.9% uptime across hybrid and Hetzner Cloud infrastructure through zero-downtime rolling upgrades and host-level resource tuning.
- Deployed Prometheus, Grafana, GCP Cloud Monitoring, Loki, and Alertmanager for distributed monitoring, alerting, and centralized log aggregation, improving detection of cross-service outages.

- Configured secure site-to-site VPC networking, load balancing, and public/private DNS routing between Hetzner Cloud hosts and GCP storage services.
- Built and maintained GitLab CI/CD pipelines for Docker builds, image registry tagging, and zero-downtime application releases.

IT Technical Support & Cloud Infrastructure Engineer, SMART PROJECT	03/2022 – 02/2025 Cairo, Egypt
• Developed Python, Bash, and PowerShell automation for system provisioning, configuration drift remediation, and backup workflows across local servers and cloud environments. • Automated backup and migration of legacy workloads and databases to GCP Compute Engine using custom automation scripts. • Configured cloud IAM, hybrid Active Directory permissions, network access controls, VPN gateways, DNS routing, and public/private IP connectivity. • Supported reliable hybrid infrastructure operations with a focus on automation, secure access, and baseline connectivity.	

Selected Infrastructure Projects

Clinic+ — Dual-Cloud SaaS Infrastructure & AI Platform, DevOps & Cloud Architect	05/2026 – 08/2026
• Architected dual cloud infrastructure with staging workloads on Hetzner Cloud and production microservices on GCP. • Provisioned GKE nodes, GCS buckets, Secret Manager credentials, Cloud Load Balancing, Cloud DNS, Cloud IAM, and Cloud Armor rate limiting. • Built GitHub Actions workflows with self-hosted runners for container builds, forward only database migrations, and zero downtime GKE rollouts. • Hardened GKE workloads with health/readiness probes, fine grained RBAC, and Cloud Monitoring metrics; deployed a FastAPI/Python AI Medical Assistant behind secure API gateways.	
Al Rajhi Bank — Enterprise Archiving System, DevOps & OpenShift Engineer	09/2025 – 04/2026
• Managed Red Hat OpenShift (OKD) clusters across DEV, SIT, UAT, and PROD environments under strict financial regulatory compliance. • Implemented Kubernetes network isolation, secret management integrations, RBAC, and Keycloak SSO authentication. • Designed repeatable GitLab CI/CD pipelines with container compliance scanning before production deployment.	
Saudi Ministry System — Enterprise Cloud & GIS Infrastructure, Lead Cloud & DevOps Engineer	06/2025 – 03/2026
• Modernized legacy GIS platforms by architecting containerized microservices on air gapped Kubernetes clusters. • Configured isolated network boundaries, internal DNS, and zero trust ingress/egress security policies. • Automated GPU cluster node provisioning and bare metal software stacks using Python, Terraform, and Ansible.	

Education

Bachelor of Science in Computer Engineering and Software Systems, <i>Faculty of Engineering, Ain Shams University</i> Grade: Very Good	02/2019 – 12/2023
---	-------------------

Certifications

Certified Kubernetes Administrator (CKA) Cloud Native Computing Foundation Jun 2026	AWS Certified Solutions Architect – Associate Manara May 2026
AWS Certified Cloud Practitioner Amazon Web Services Feb 2025
