

KHALID SALMAN

Senior DevOps OpenShift & Kubernetes Engineer

✉ Khalid.salman1996@gmail.com ☎ +966 599 303 210 📍 Riyadh, Saudi Arabia 🔗 [linkedin.com/in/khalid-salman96](https://www.linkedin.com/in/khalid-salman96)

Professional Summary

DevOps and Cloud Engineer with hands on experience supporting enterprise production environments, Red Hat OpenShift, Kubernetes, CI/CD automation, GitOps, and containerized microservices across regulated and high availability environments. Experienced in designing and maintaining CI/CD pipelines using GitLab CI/CD, GitHub Actions, and Jenkins, deploying and operating Kubernetes, OpenShift workloads, and implementing repeatable application delivery processes across DEV, SIT, UAT, and PROD environments.

Strong background in OpenShift/OKD, Kubernetes/GKE, Docker, ArgoCD, Terraform, Ansible, Linux, networking, observability, and DevSecOps. Experienced with enterprise banking infrastructure, production critical application platforms, zero downtime deployments, RBAC, network isolation, secrets management, container security, and automated release processes. Focused on platform reliability, deployment automation, troubleshooting, security, scalability, and continuous improvement.

Education

Bachelor of Science in Computer Engineering and Software Systems

02/2019 – 12/2023

Faculty of Engineering, Ain Shams University, Grade: Very Good

Professional Experience

DevOps & Cloud Infrastructure Engineer, EBTEKAR WAKHTHOR LTD

05/2025 – Present | Riyadh, Saudi Arabia

- Administered high availability Kubernetes and Red Hat OpenShift (OKD) environments supporting containerized applications and microservices.
- Managed application deployment and platform configuration using Kubernetes, OpenShift capabilities including Ingress, HPA, RBAC, Workload Identity, and fine grained network policies.
- Designed and maintained multi stage CI/CD pipelines for .NET and Python microservices using GitLab CI/CD, covering automated builds, container image publishing, build caching, and zero downtime rolling deployments.
- Supported repeatable application delivery across enterprise environments through automated build, deployment, configuration, and release workflows.
- Implemented DevSecOps controls including IAM least privilege, service account key rotation, Trivy container scanning, and SonarQube quality gates.
- Provisioned multi tenant GCP and AWS infrastructure using Terraform and Ansible, configuring VPCs, Cloud NAT, load balancers, and supporting infrastructure.
- Reduced infrastructure provisioning time by more than 80% through infrastructure automation.
- Reduced application delivery feedback loops by 60% through optimized CI/CD workflows and automated deployment processes.
- Improved production reliability through Kubernetes operations, infrastructure automation, secure networking, and standardized deployment practices.

Cloud Administrator & Infrastructure Engineer (Part-Time), RAED IT SERVICES

01/2023 – 01/2026 | Remote

- Maintained 99.9% uptime across hybrid and Hetzner Cloud infrastructure through zero downtime rolling upgrades, infrastructure tuning, and proactive operational management.
- Built and maintained GitLab CI/CD pipelines for Docker builds, image registry tagging, and automated zero downtime application releases.
- Supported containerized application delivery through automated image builds, registry management, deployment workflows, and production release processes.
- Deployed Prometheus, Grafana, GCP Cloud Monitoring, Loki, and Alertmanager for production monitoring, alerting, metrics, and centralized log aggregation.
- Improved detection of cross service infrastructure issues through centralized observability and alerting.
- Configured secure site to site VPC networking, load balancing, public, private DNS routing, and connectivity between cloud environments.
- Supported Linux based infrastructure operations, troubleshooting, upgrades, networking, and production reliability.

IT Technical Support & Cloud Infrastructure Engineer, SMART PROJECT

03/2022 – 02/2025 | Cairo, Egypt

- Developed Python, Bash, and PowerShell automation for infrastructure provisioning, configuration drift remediation, backup workflows, and operational tasks.
- Automated backup and migration of legacy workloads and databases to GCP Compute Engine.
- Configured cloud IAM, hybrid Active Directory permissions, network access controls, VPN gateways, DNS routing, and public, private IP connectivity.
- Supported reliable hybrid infrastructure operations with emphasis on automation, secure access, Linux administration, networking, and infrastructure troubleshooting.

Core Technical Skills

OpenShift & Kubernetes

Red Hat OpenShift (OKD), Kubernetes, GKE, Docker, Ingress, HPA, RBAC, Network Policies, Workload Identity, Containerized Microservices, Application Deployment, Production Operations

GitOps & Application Delivery

ArgoCD, GitOps, Kubernetes Application Delivery, Declarative Deployment, Environment-Based Deployments, Microservices Delivery

Cloud & Infrastructure

GCP, Google Kubernetes Engine (GKE), AWS, Hetzner Cloud, Linux, RHEL, Ubuntu, GCP VPC, Cloud NAT, Load Balancing, Cloud DNS, Cloud Storage, Artifact Registry

Security & Enterprise Platforms

IAM Least Privilege, Zero Trust, RBAC, Network Security Policies, Secrets Management, Trivy, SonarQube, Keycloak SSO, Active Directory, Cloud Armor, VPN

CI/CD & DevOps Automation

GitLab CI/CD, GitHub Actions, Jenkins, Docker Builds, Automated Builds, Automated Deployments, Rolling Deployments, Zero-Downtime Releases, Container Registries, Release Automation

Infrastructure as Code & Automation

Terraform, Ansible, Python, Bash, PowerShell, Infrastructure Provisioning, Configuration Management, Automation, Configuration Drift Remediation

Observability & Reliability

Prometheus, Grafana, Loki, Alertmanager, GCP Cloud Monitoring, Cloud Logging, Metrics, Log Aggregation, Alerting, High Availability, 99.9% Availability

Certifications

Certified Kubernetes Administrator (CKA)

Cloud Native Computing Foundation | Jun 2026

AWS Certified Solutions Architect – Associate

Manara | May 2026

AWS Certified Cloud Practitioner

Amazon Web Services | Feb 2025

Selected Enterprise DevOps Projects

Clinic+ — Dual-Cloud SaaS Infrastructure & AI Platform, *DevOps & Cloud Architect*

05/2026 – 08/2026

- Architected dual cloud infrastructure with staging workloads on Hetzner Cloud and production microservices on GCP.
- Provisioned and operated GKE infrastructure including nodes, Cloud Load Balancing, Cloud DNS, IAM, Secret Manager, GCS, and Cloud Armor.
- Built GitHub Actions CI/CD workflows with self hosted runners for container builds, database migrations, and zero downtime GKE deployments.
- Implemented automated application delivery workflows for containerized FastAPI Python microservices.
- Hardened Kubernetes workloads using health readiness probes, fine grained RBAC, and Cloud Monitoring metrics.
- Supported production application reliability through automated deployments, Kubernetes configuration, monitoring, security controls, and controlled release processes.

Al Rajhi Bank — Enterprise Archiving System, *DevOps & OpenShift Engineer*

09/2025 – 04/2026

- Managed Red Hat OpenShift (OKD) clusters across DEV, SIT, UAT, and PROD environments within a highly regulated financial enterprise environment.
- Supported enterprise application deployment and platform operations across multiple environments with consistent configuration and controlled release processes.
- Implemented Kubernetes OpenShift network isolation, RBAC, secret-management integrations, and Keycloak SSO authentication.
- Designed repeatable GitLab CI/CD pipelines for containerized applications with compliance scanning before production deployment.
- Supported secure and controlled application delivery in accordance with financial regulatory and enterprise security requirements.
- Applied container security and deployment controls to reduce production deployment risk.
- Worked with enterprise application infrastructure where reliability, security, controlled releases, and environment consistency were critical.

Saudi Ministry System — Enterprise Cloud & GIS Infrastructure, *Lead Cloud & DevOps Engineer*

06/2025 – 03/2026

- Modernized legacy GIS platforms by deploying containerized microservices on air gapped Kubernetes environments.
- Designed isolated network boundaries, internal DNS, and zero trust ingress egress security policies for production infrastructure.
- Automated Kubernetes GPU cluster node provisioning and bare metal infrastructure using Python, Terraform, and Ansible.
- Supported enterprise application platforms requiring secure, isolated, and highly controlled deployment environments.
- Applied infrastructure automation and Kubernetes operational practices to improve repeatability and platform efficiency.
